Wolfram Syndrome is a rare form of Type 1 Diabetes, which is currently terminal—it also causes blindness, deafness, coordination loss and many other complications—and ultimately early death due to loss of muscle control and respiration—UNLESS WE STOP IT!

With your help the FIRST EVER CLINICAL TRIAL FOR WS HAS BEGUN—Ellie is the FIRST patient!

Time is of the essence... while there is currently no cure, there is a promising drug on the horizon that could slow the progression of the disorder and give Ellie and the kids with WS the time we need to find a cure. The donations from this event will go directly to help more children get into the Clinical Trial AND begin studying another promising new drug! YOU are part of a CURE!
